

Telia Carrier Cloud Connect

# GET ON YOUR CLOUD

Control

Flexibility

Scalability

**With business-critical applications and data in the public cloud, there's no room for compromise. Telia Cloud Connect ensures a secure, dedicated and scalable connection to your cloud, wherever that may be.**

## The world at your feet

Virtual services start in the real world. Our leading backbone is currently ranked #1 globally\* and stretches 65,000 km, linking more than 265 PoPs (Points-of-Presence) in key datacenter locations across Europe, North America and Asia. We're directly connected to the world's largest cloud providers, including Microsoft, Amazon, Google and IBM. With multiple redundant and geographically diverse connections to the major clouds and the security of dedicated MEF CE2.0 certified Ethernet circuits, we bring the cloud to you, on your terms.

## The sky's the limit

Whether you need secure access to a cloud service provider yourself, or a connection for your customers, we facilitate a direct route to the cloud. You get the flexibility of cloud workflows and dependability of dedicated network services, with the guarantees of an enterprise grade service level agreement.

And to support evolving business needs, we offer flexible bandwidth options, a simple, transparent pricing model and

the possibility to connect to over 150 PoPs worldwide. You can reach any and all of your clouds across one physical connection and double-up for redundancy. You can even interconnect your ports with our datacenter-to-datacenter service and create a virtual backbone of your own.

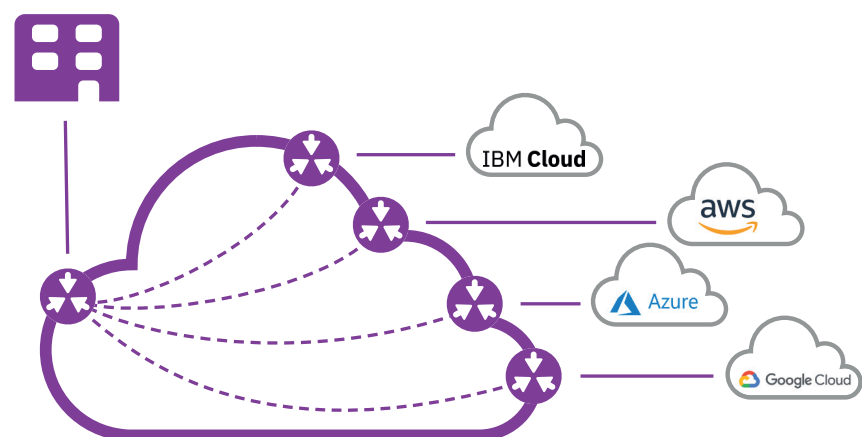

## Quality where it counts

Reliance on the cloud means greater operational responsibility for you. And with increasing regulatory and data compliance expectations, the need for full visibility and control of your ecosystem has never been greater.

With critical cloud resources potentially hundreds, if not thousands of kilometers away, it pays to ensure that your longest link is your strongest.

Owning our own backbone gives us end-to-end, top-to-bottom control. And that translates into end-to-end quality, reliability and security for you. And while our award-winning customer care team and state-of-the-art network operations center take care of the network, our self-service portal allows you to manage your connections, and stay ahead in the cloud.

## Cloud Coverage

|                       | Europe | US         |
|-----------------------|--------|------------|
| Amazon Web Services   | •      | •          |
| Microsoft Azure       | •      | •          |
| Google Cloud Platform | •      | •          |
| IBM                   | •      | on request |

## Cloud & More Pricing

### PAY-AS-YOU-GROW

Choose your port (and contract length, 1-36 months) and add cloud or datacenter-to-datacenter connections as and when you need them.

### FLAT RATE

Choose your port (and contract length, 12–36 months) and fill it with as many cloud or datacenter- to-datacenter connections within a continent for a flat monthly fee.

### Key Benefits

- Data center-to-data center and data center-to-cloud connections from more than 150 PoPs
- Simple and transparent pricing
- Flexible contracts that allow you to connect on your terms
- Award winning customer service and experience
- A carrier grade SLA

### About Telia Carrier

Telia Carrier owns and operates one of the world's most extensive fiber backbones. Its mission is to provide exceptional network infrastructure and services – empowering individuals, businesses and societies to execute their most critical activities. By working close to their customers, Telia Carrier makes big ideas happen at the speed of fiber.
